

## TORATORA

---

With over 370 acres of spectacular native bush, meandering creeks, pine forestry and coastal hill country farmland, few other places in New Zealand will offer the diversity of environment that TORATORA will. Set predominately in Native bush, trails will snake through over 13km of wide, single-track, flowing trails designed and built by one of New Zealand's most specialized mountain bike trail builders.

With ever changing vistas, the breathtaking, diverse scenery will be the only possible distraction from the thrills on offer. Berms, tabletops, moderate hill climbs, technical switchbacks, rollers and long open down-hills have been designed and built exclusively for both beginner and experienced mountain bikers. Depending on how bikers opt to 'attack a track' both beginner and experienced riders will feel challenged and rewarded. TORATORA will also offer optional 'expert only' down-hills to challenge the more experienced riders.

TORATORA is going to be an exhilarating adventure with tracks that embody the unspoiled nature of the landscape. Moderate hill climbs will deliver riders to breathtaking 360 degree views of the Southern Wairarapa, including the wild and rugged Tora Coastline.

Enveloped by a huge variety of flora and fauna, you will be awed by animal sightings, the unique smell of native bush and the feel of adrenalin pumping through your veins.

---

**"Because the complete 13km one-way loop was built by a mountain biker, the climbs are not too steep, but the descents are steeper in places and have big bermed corners that you can rail. It is not a hard long uphill slog followed by 1 descent, rather a rolling rewarding ride through quiet forests with spectacular views on the top ridges".**

*Marco Renalli – Port Nicholson Ponoke Cycling Club of Wellington*
